Natanael Sijabat

Fullstack Engineer

Semarang, Indonesia | github.com/NatanaelSijabat

PROFILE

Fullstack engineer with professional software development experience since 2022 across frontend and fullstack roles. Builds business-oriented web applications, backend APIs, payment and delivery integrations, operational dashboards, and mobile-connected services. Works with React, Next.js, TypeScript, Node.js, Hono, NestJS, and relational and document databases.

CORE SKILLS

Frontend Engineering:
React, Next.js, TypeScript, JavaScript, Vue.js, Nuxt.js, Tailwind CSS, TanStack Query, TanStack Table, Zustand, Redux Toolkit, React Hook Form, Zod, Vite, Capacitor

Backend & API Development:
Node.js, Hono, Bun, Express.js, NestJS, PHP, Laravel, REST APIs, Authentication & RBAC, Idempotency, Rate limiting, Background workers, OpenAPI documentation

Databases & Data Modelling:
MySQL, PostgreSQL, MongoDB, Prisma ORM, Sequelize, Redis, Schema design, Migrations, Query optimisation, Indexing, Caching

Integrations & Business Workflows:
Payment gateway integration, Cooperative savings workflows, Delivery rate services, Multi-tenant authorization, Order and payment state consistency, Third-party API integration, SEO and Open Graph metadata

DevOps & Developer Tooling:
Docker, Docker Compose, GitHub Actions, Nginx, Linux VPS, SSL / Certbot, Cloudflare DNS, Cloudflare R2 & CDN, cPanel, Git, Postman, Browser developer tools

PROFESSIONAL EXPERIENCE

Senior Full-Stack Developer - KSP Nasari

Apr 2026 - Sep 2026 | Full-time | Collab Coop / KDKMP digital ecosystem

- Worked across the Collab Coop / KDKMP digital ecosystem, spanning merchant management, marketplace, cooperative payments, courier services, and ride-hailing.
- Built backend services with Hono, TypeScript, Bun, Prisma, MongoDB, and Redis, keeping routes, services, schemas, and domain features separated as the system grew.
- Implemented payment workflows with transaction validation, idempotency, payment status handling, and order consistency across retried or duplicated requests.
- Delivered the ride-hailing flow end to end: quotation, booking, order creation, driver search and assignment, live tracking, trip completion, ratings, history, and cancellation.
- Implemented courier and delivery workflows and multi-tenant authorization connecting users, branches, cooperative entities, merchants, and stores through role-based access control.
- Built merchant self-service tools for store information and product management.
- Built the companion mobile application with React, Vite, Capacitor, TanStack Query, Zustand, React Hook Form, Zod, and Tailwind CSS, translating Figma flows into production interfaces.
- Improved database and API performance through caching, validation, and safe data-mutation patterns; maintained OpenAPI documentation, tests, linting, and deployment checks.

Full-Stack Developer & DevOps - HimaPersis

Mar 2026 | Freelance | HimaPersis v2 - public website and dashboard

- Built the public website and member dashboard with Next.js 15, React 19, TypeScript, Tailwind CSS, NextAuth, TanStack Query, React Hook Form, and Zod.
- Developed Hono/Bun/Prisma/MySQL backend modules for authentication, member and cadre records, territorial data, content management, and dashboard analytics.
- Implemented a Cloudflare R2/CDN media pipeline with Sharp processing, background workers, and

generation of PDF, image, and Open Graph assets.
- Configured Docker Compose, an Nginx reverse proxy, SSL with Certbot, Cloudflare DNS, separate staging and production environments, and GitHub Actions deployments.
- Implemented authentication and role-based access control across public pages, dashboard routes, and protected API endpoints.

Frontend Developer - PT Ganesha Operation

Nov 2023 - Dec 2024 | Full-time | Web application platform

- Built and maintained scalable web applications in Next.js, turning UI/UX mockups into responsive, dynamic interfaces.
- Designed the API consumption flows and worked with backend, QA, and product teams to deliver features on schedule.
- Improved rendering and data-fetching performance through component-level refactoring and client-side state management.
- Took part in sprint planning, code reviews, and release validation to keep delivery quality consistent.

Frontend Developer - DuiToken

Oct 2023 | Freelance | Real-time cryptocurrency exchange dashboard

- Built a real-time cryptocurrency exchange dashboard in React, integrating Server-Sent Events for live price and metric streaming.
- Developed reusable chart and analytics components that consume live market data with consistent formatting and loading states.
- Handled streaming edge cases such as reconnects, delayed updates, and empty states so dashboard data stayed accurate.
- Improved frontend performance through state management and code optimisation on the responsive analytics layouts.

Full-Stack Developer - HimaPersis

May 2023 | Freelance | HimaPersis v1 - website and API

- Designed the MySQL database schema for operational workflows and content management.
- Built RESTful APIs with NestJS and the public web application with Next.js.
- Implemented authentication and role-based access for administrative content and data management.
- Maintained API documentation, validated endpoints with Postman before each release, and managed deployment on cPanel hosting.

Full-Stack Developer - Pelabuhan Kepri

Jun 2022 - Jul 2022 | Freelance | Company profile website and API

- Designed and optimised the MySQL database architecture so content processing stayed efficient.
- Built RESTful APIs with Express.js and a responsive company profile website with React.
- Normalised relational tables and added indexes to keep queries fast as content volume grew.
- Deployed the full application to cPanel with production configuration and verified cross-browser responsiveness.

EDUCATION

Bachelor of Informatics Engineering - Universitas Maritim Raja Ali Haji

2015 - 2022

CERTIFICATIONS

IBM Bob Hackathon - Certificate of Completion

lablab.ai | Participant | Awarded 12 June 2026 | ID CMQAZMHIA033DS601GX9TOM3A

AMD Developer Hackathon - Certificate of Completion

lablab.ai | Participant | Awarded 17 June 2026 | ID CMQHZY1SG02RTS601YYXBIR01
